PROJECTS

[GetMyNotes](#)

- A simple **website** to provide **Written notes**(course-wise and branch-wise)to my college students.
- On completion of this project I was able to :
 - Develop the **front-end design**, for the website using **HTML, CSS and Bootstrap**.
 - Know about how a website actually **appears in the front-end** and how it **works in the back-end**.

[Book Recommender System](#)

- A website to **recommend popular and relatable books** on the basis of their past activity.
- On completion of this project I was able to :
 - Develop the **front-end design**, for the website using **HTML, CSS and Bootstrap**.
 - Know about functioning of **Collaborative-Filtering** in the **back-end**.
 - Gather basic knowledge of **back-end** technologies like **Python-flask**.
 - Also the **back-end** in **Python** and the popular libraries used are **Numpy, Pandas, Sci Kit-learn, Pickle**.

ACHIEVEMENTS

- Solving problems on Leetcode. [Link](#)
- Lead the team of 4 members for a Mini Project executed in Academics.
- Received a Certificate from Udemy on completing the Web Development course.
- Created and successfully managed a DropShipping Store.
